

Hatem Lamine

Full-stack web developer

Application context:

I'm currently employed as a full-stack web developer at XQuant - Seoul, South Korea (full-time, remote from Tunis). Concurrently, I'm a 5th-year software engineering student at INSAT. To fulfill my software engineering degree requirements (modeled after the French system), I'm planning a mandatory six-month or longer end-of-study internship, in Europe.

EXPERIENCE

Full-stack Web Developer

[XQuant](#) - Seoul, South Korea · 01/2022 - Present

Full-time · Remote

- Participated in PR reviews to maintain quality standards.
 - Made decisions paired with constructive comments and feedback, to approve or reject merges involving multiple features, fixes, and refactors.
- Wrote **end-to-end** high-quality code for complex features.
 - Such as: comparing two documents side by side (like github commits), managing user workspaces, and exposing analytical statistics for contract documents.
- Effectively navigated high-pressure situations, guiding my subteam to optimal performance with a **pragmatic** and composed approach.
 - Communicated and proposed robust, rational solutions for multiple complicated problems.

Tech : Next.js · React.js · TypeScript · Tailwind · Radix UI · React Query + Axios · React Hook Forms · Zod · Docker

Full-stack Web Developer

[EY](#) - Tunis, Tunisia · 12/2020 - 12/2021

Full-time · On-site

- Set-up advanced API endpoints with efficient DB queries and schema validation.
 - Created customizable frontend pages and components that consume them while maintaining end-to-end type safety and **graceful error handling**.
- Contributed to the architectural decisions for two modules within the EY Global Tax e-invoicing solution, considering:
 - business requirements, specific quality attributes, and compositions of domain teams for each module.

Tech : Next · React · TS · Tailwind · React Query · React Hook Forms · Zod · Docker

Full-stack Web Developer

[Keyrus](#) - Tunis, Tunisia · 05/2020 - 11/2020

Internship · On-site

- Migrated a large expense management solution from Nuxt.js 2 to Nuxt.js 3 and created end-to-end features.

Tech : Vue 3 · Nuxt 3 · TS · Express.

Front-end Web Developer

[UpKurs](#) - Tunis, Tunisia · 03/2020 - 04/2020

Internship · On-site

- Implemented 20% of the front-end material for a video-conferencing app, in collaboration with the UI/UX team.

Tech : Angular · TS · CSS · Nest.js · Figma

TECH STACK

- Full-stack** : Next, React, TypeScript, React Query + Axios, Zustand/Jotai, Tailwind CSS, Radix UI, Shadcn UI, React Portals, MySQL, Redis, PostgreSQL, PlanetScale, UpStash, Drizzle ORM, Prisma, NextAuth, Clerk, Stripe, React Hook Forms, Zod, Express, tRPC.
- Devops** : Docker, Kubernetes, Jenkins, AWS, Azure, Vercel
- Basics** : JS, TS, Node.js, CSS, HTML, Git.
- Concepts** : Performance Optimization, Queries & Caching, Error Handling, Software Architecture, UI/UX Design, SEO.

EDUCATION

INSAT University - Tunis · 2019 – Present (5th year).

[Software engineering](#)

[Expected software engineering degree in 2024.](#)

Pioneer High School Of Nabeul · 2015 – 2019

[Baccalaureate mathematics](#)
